

The Manifesto was created through conversations with the two Boards as a part of a learning experience in June 2023.

It sets out their aims of how to work together and what they want to achieve to ensure that the Boards are united, stay on track and make change.

Together - it is not what one can do for the other, it's what we can do with each other - to better the experience for all.

As two Boards joining forces, we pledge to be
